

Introduction, Game background, User Requirements, Navigation overview and page designs.

Introduction

League of legends is a game I play passionately and almost daily, I have created a website where players can discuss and upload what they think is worth seeing. I have used everything asked in CCEA's checklist in my website and more. I have 12 pages on my website and it's non-profit. My website is user-friendly and there is no explicit content so it's suitable for all users, including users with sight impairments and/or hearing impairments.

Game background

League of legends (previously known as League of Legends: clash of Fates) is a multiplayer online battle arena genre video game developed by Riot games. It was designed to operate on the Microsoft windows operating system. The game was first announced on October 7th, 2008 and released a year later on October 27th, 2009. The game was in beta from April 10th, 2009 to October 26th 2009.

The beginning of League of legends' development was sparked at the close of 2005 with the idea of a standalone spiritual successor to the popular War craft III mod, Defense of the ancients. League was born "when a couple of very active DotA community members believed that the game play was so much fun and so innovative that it represented the spawning of a new genre and deserved to be its own professional game with significantly enhanced features around-game services.

Riot Games was co-founded by Brandon Beck and Marc Merrill. Together they partnered with some of the key creative minds behind the creation of DotA: All-stars, Steve "Guinsoo" Feak and Steve "Pendragon" Mescon, in League of legends core development. Riot games officially opened its office in September 2006. The company currently has about one hundred staff members working on league of legends, including their robust technology platform to service and operate the game as well as a team dedicated to community relations. "

User Requirements

- I will use text and formatting which is appropriate for the medium chosen to present package (web friendly fonts)

- I will tie in colour and text styles to make the website look as if it had a flow in it.
- When using links I will develop a package-wide consistent navigation system (Spry menus)
- I will create and use links to various media and art styles and/or artist pages.
- I will create and use links and hyperlinks for effective navigation through the package
- I will create and use links that will allow you to download said media on my website.

When collecting assets and creating media I will:

- I will use appropriate software to create and edit graphics, movie, animation and sound files of suitable format and size for inclusion in the package;
- Collect existing assets (such as existing images and electronic text) for use in the package

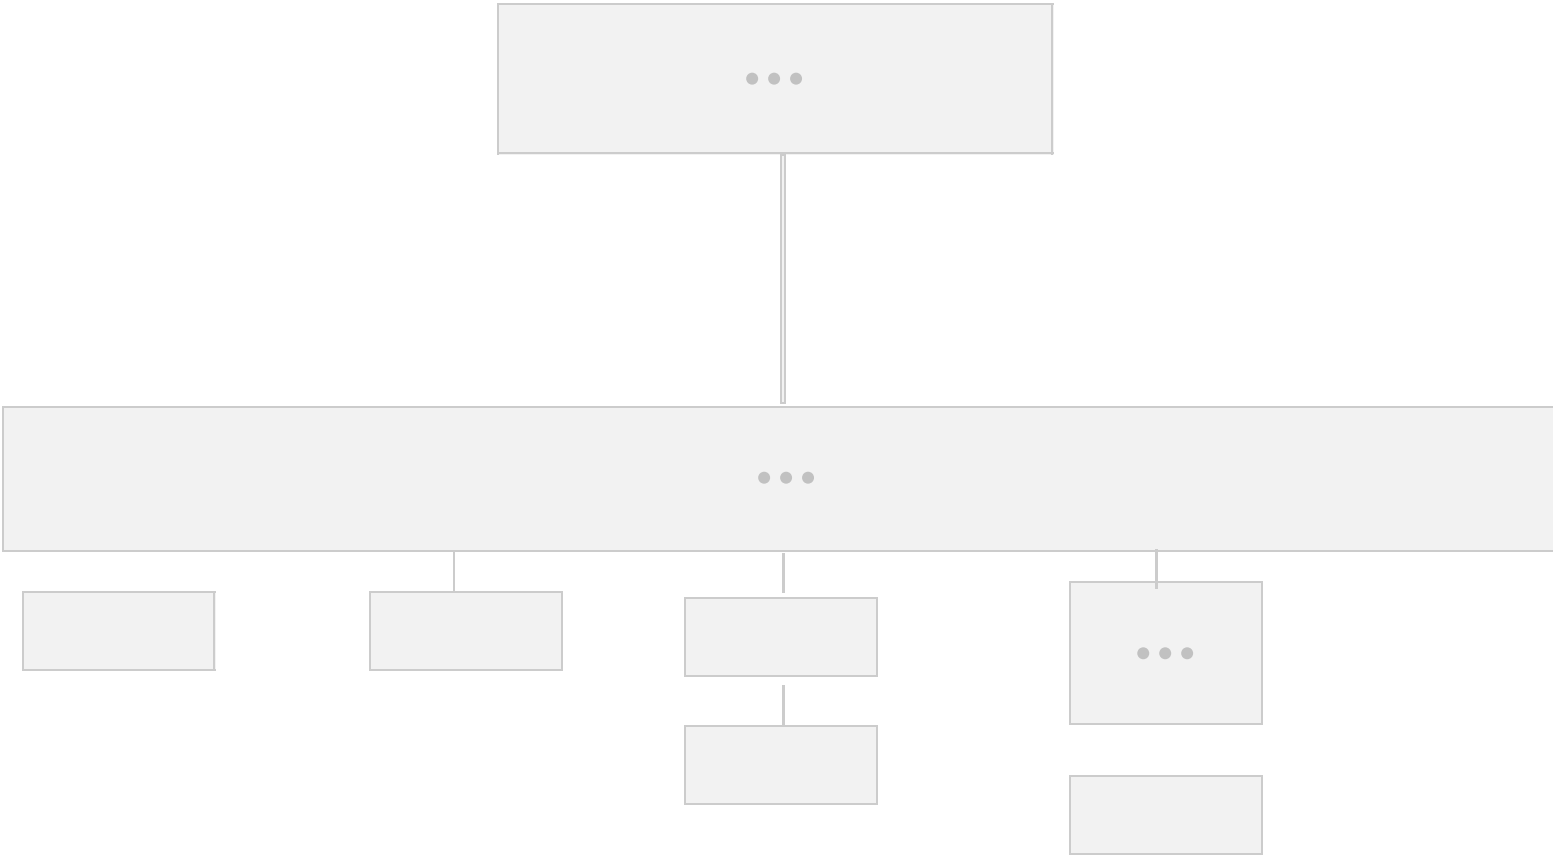

When using media I will:

- Incorporate a range of original media into the package in the form of graphics, animation and possibly sound.
- I can provide information for users who require plug-ins for some images/sounds (e.g. flash player or a sound card)

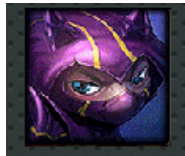

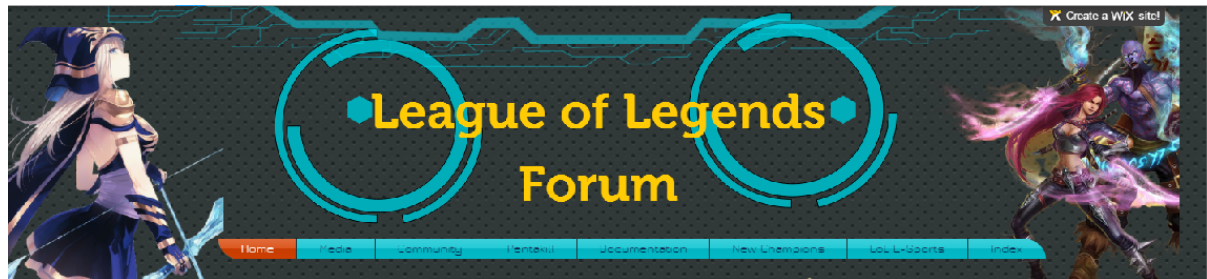

When providing interaction and feedback:

- I will create a page on my website that allows users to send feedback to me via email through the use of a form, data collection and submission.
- The website should be aesthetically pleasing to the viewer
- The colour scheme used should be appropriate and consistent
- The website should be template-based meaning the design and layout should be consistent throughout
- The text format and style should remain consistent throughout
- There should be user interaction on every page
- The user will be able to request further information via a page which should enable the user to input their details and choose from drop-down menus, tick-boxes and radio buttons
- The website should be intuitive and easy to follow
- The website should include various graphics created by myself
- The website should also include at least one video file which should be relevant to the website
- There should be at least one animation created by myself which should be relevant to the website....etc

Fanart

Designated Area for Fan Art! (gif here on a champion)
The area were fans get their say in things! There are some outstanding artists lurking in the league community who really don't get the praise they deserve when it comes to

their art. I've added this page to give you an overlook on things to do with their art. This is a text box with this information inside.

A picture hyperlinked to Sharrm's deviantart

were he submits fanart daily, along with text beside it explaining his work.
